Special Districts	187 - 223

INTRODUCTION

Page i

This report, prepared under Section 14683 of the Government Code, revises the statistical data presented in the 1965 Senate Permanent Fact Finding Committee on Natural Resources report, "Public Land Ownership and Use in California", and in the earlier editions of this report. In those cases where current information has not been submitted by the public land owner, the earlier data have been shown and referenced accordingly.

In addition to the 49 plus million acres of land in public ownership listed in this report, there are approximately 3 million acres of coastal tide and submerged lands, of which some 200,000 acres have been placed under local jurisdiction by legislative grant. The remainder is under the jurisdiction of the State Lands Commission. Neither is this 3 million acres included in the area of California (101,563,520 acres) shown in the California Statistical Abstract of 1976.

The use of the Housing and Home Finance Administration (now Housing and Urban Development "HUD") standard land use code will expand the utility of the basic data file by permitting easy sorting by specific land use. The basic data are being maintained on punched cards and can be made available to users in that form. Persons not familiar with the H.H.F.A. coding system are referred to the H.H.F.A. and Bureau of Public Roads publication, "Standard Land Use Coding Manual."

Comments from users regarding accuracy, format, or content will help to make future editions of this report more valuable. Such comments in the past have resulted in identification and correction of a number of errors.

Additional copies of this report may be obtained at \$3.50 each. Comments regarding the report and orders should be addressed to:
